A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

Fully implemented: All projects increasing impervious surface area by 100 sq. ft. or more must have a "no net increase" in the rate of runoff from the site by controlling stormwater runoff using methods identified in the stormwater manual. Inspections are required for all stormwater management systems installed. In 2014, the stormwater map was updated to include management practices and a table of maintenance and inspection requirements was completed for stormwater facilities.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

100% of projects are inspected when installed. New management facilities must have inspection and maintenance plan.
